WAKE UP, SPEAK OUT!

Take ACTION Today!

Educate yourself, share your knowledge, make yourself heard!

Tell friends, family, neighbors, coworkers what's going on right under their noses.

Contact your Town Administrators, Atty Gen, State and US Reps & Sens, and Governor, etc.

Hold community meetings; consider showing *5G Apocalypse* or any other excellent video on the subject of wireless dangers

Find or organize an active 5G opposition group in your area; join or organize protests; advertise information about 5G

Write letters-to-the-editor of well-read publications. Personal stories and opinions are good! Spread on social media!

12 Good Reasons to Oppose

5G

...for life's sake...

1 5G wireless technology is quietly being deployed everywhere in the world

5G (fifth generation) wireless technology is now being rolled out without public knowledge or participation. It is industry driven and government sanctioned. It is by orders of magnitude more powerful than 4G, which is already very powerful and dangerous. This unavoidable 24/7/365 exposure to weapons grade microwave radiation has a growing number of scientists, medical professionals and others, very concerned about impacts on health, privacy, security, finances, choice, and more.¹

2 5G technology has not been proven safe, and IS NOT safe

While there are enough independent studies on wireless radiation to cause great reason for concern, industry has escaped scrutiny because the FCC has refused to conduct an environmental review of small cell (5G) infrastructure, or follow legislated protection, and has forbidden discussion of health effects in public hearings.²

3 5G will create severe health effects of epidemic proportions

Already, increasing numbers of people suffer from EHS, or Electromagnetic Hypersensitivity Syndrome, which can be debilitating and prevent people from being around electronic devices.³ Exposing the world's entire population to 5G radiation 24/7 will undoubtedly create a huge night-

mare epidemic of neurological and other effects that won't be able to be mitigated

4 5G wireless technology is harmful to ALL living things

5G is very powerful microwave radiation. When fully operational, escape from it will be impossible. The radiation will be in frequencies never before subjected to living things outside of a laboratory setting.⁴ Pets, wildlife, and plants will all be affected.

5 20,000 5G satellites are scheduled for orbit by 2020

This will enable 5G microwave radiation to be beamed worldwide at all times, with no avoidance possible. Some have already been launched.⁵

6 Worldwide scientific outcry against 5G⁶

Scientific and medical professionals everywhere are beginning to wake up to the horrors of 5G. Hundreds have signed a 2017 International Appeal for a Moratorium for 5G roll-out, to help stop this 5G insanity.

7 You neither need nor benefit from 5G

The only "benefit" of 5G to you will be to make Internet-related speeds faster. The risk involved for this relative luxury is unacceptable. Fiber optics wired to your house will accomplish the same thing. Large corporations will benefit from 5G in the short term, and governments will be able to invade privacy much more easily.⁷

8 5G will add to, not replace, current wireless technology⁸

4G technology is very powerful, dangerous,

and unregulated. Adding such huge power on top of this, also unstudied for health and environmental effects, is unconscionable.

9 5G decreases property values

Real estate studies have determined that property values decrease when cell phone towers are placed in neighborhoods.⁹ Small cell (5G) antennas are required to be placed very close to homes.¹⁰

10 5G antenna deployment will result in unsightly tech junk everywhere, as well as scarred landscapes

Antennas will be placed on street lights, utility poles, bus stops, sides of buildings, hills, on any public property possible, where people will have full-on exposure when walking by, and have to live with the view out their windows, not to mention the radiation.

11 Most local and state gov'ts. have no idea what's coming

Governing bodies have been kept in the dark about 5G realities by FCC laws that also prevent them from avoiding deployment and operation in their jurisdictions.¹¹ However, a few governments are now fighting back.

12 Do you want a 5G antenna in front of YOUR home??

If not, PLEASE HELP!!

"Never doubt that a small group of thoughtful, committed citizens can change the world; indeed, it's the only thing that ever has." – Margaret Mead
